Theme:	**Fly Away**	HQ

Date: 11/09 Duty Six: red

Time	Min	Activity	Equipment	Scouter
	05	**GRAND HOWL** Flag Prayer Register Break	Totem/skin/rock Flag/flag pole Prayer book Register	Akela
We need wind to fly kites and everyone knows how the wind can mess up your hair....did you brush your hair before coming to Cubs today?				
	05	**INSPECTION:** Scarf as an armsling using reef knot- this time no revision, Cubs do it on their own.	Gems	Alpha Bravo Charlie Delta
Kites need long tails so that they will stay balanced when they are up in the air – if you lose your tail you will need to sit down as you won't be balanced.				
	05	**STEAM RELEASE:** Tails Divide the Pack into two teams. All players tuck knottin ropes loosely into their belts in back to signify tails. On a signal, each team rushes toward the other, trying to capture their tails. Once a Cub's tail is taken, that Cub is out of the game. The capturer ties the tail to the front of his/her belt. The team that captures the most tails wins. Set a time limit.	Knotting ropes	Bravo
We also need a lot of wind in order to fly a kite.				
	10	**RELAY GAME:** Floating Feather (Kite) The object of the game is to keep a feather (kite) moving by means of wind. To start the game, Cubs get into Sixes. In front of each Six is a stiff piece of card and a feather. The Cub fans the cardboard to create wind so the "kite" can move across the designated area and back to the Six. (Can even try keeping it in the air although the younger Cubs might find it tricky). The next Cub will then have a turn. Can use anything light, e.g. tissue paper, confetti, etc.	Bits of paper/feathers; stiff card	Charlie
Now that we realise how important it is to have wind to fly a kite – what would happen if the wind got too strong?				
	05	**YARN:** Go Fly a Kite	Yarn	Akela

Time	Min	Activity	Equipment	Scouter
Now that we know a bit about kites, you can make and fly your own.				
	25	**HANDCRAFT:** Newspaper Kites **<u>NB:</u>** Do all the measuring of the kites beforehand and reinforcing (can use masking tape) and make one stick for each Cub as this activity can take a while to put together – they can cut out and make one stick. A lot of wind is needed and a lot of string is needed to fly these kites but they are worth it. To attach string to kite use round turn, two half hitches.	Plastic shopping bags; scissors; tape; string Example kite per six.	In sixes: Alpha Bravo Charlie Delta
Wow that was fun – and now something completely different.				
	15	**WORK SESSION:** Knotting	GW: Bowline and sheetbend SW:reef knot and slip reef	Knotting ropes GW-Akela SW in sixes with Alpha, Bravo, Charlie and Delta
One thing we learnt whilst trying to fly our kites is how important it is to have a long string.				
	05	**ACTIVE GAME:** Chain Tag Cubs are scattered over the playing area. One player is "IT" and tries to tag another player. The first Cub he/she tags joins hands with him/her and helps in tagging others. Both may use only their free hand to tag. Each player tagged joins hands with the one tagging him/her. The line grows longer as more players are tagged, but only the players at the two ends of the chain may do the tagging. Tagging doesn't count if the chain is broken. The game continues until all the Cubs have been tagged.	None	Delta
Let's end off with a song about flying kites.....				
	05	**SINGING:** If you're happy.....	(If time permits)	
	05	**NOTICES/BADGES**	Ollie, Bird badge	
	05	**GRAND HOWL** Flag Prayer Dismiss	Totem/skin/rock Flag/flag pole Prayer book	

Yarn:	**Go Fly a Kite**

Rachel was very excited. Akela was taking the Cubs on a special adventure this Saturday and she had said that she had a big surprise for the Cubs today. Out of her trunk she pulled the biggest kite Rachel had ever seen! "Let's go!" Akela shouted. Down to the beach they went. It was a very windy day, perfect for kite flying - *or so they all thought.*

OK Rachel – it is your turn to go first, you hold the kite and I'll pull it into the sky." Rachel ran down the beach with the kite and then held it tight. Akela yelled "Let go" as she pulled hard on the string. But it was so windy that Rachel didn't hear her.

Akela called to Rachel. "OK. Now it's Robert's turn to fly the kite!" But when she looked around, she couldn't see Rachel anywhere. There were no trees for her to hide behind. Where could she be? Then they all looked up. *Waaayyyyyy* up! They could just see Rachel peeking over the end of the kite. She was flying!

"Rachel! Get down here!" But Rachel could not get down. Akela started to reel in the kite. But just as Rachel was getting close to the ground - the string broke! The kite flew up, up, up with Rachel still holding tight!

"Get me down!" yelled Rachel. Akela was now running down the beach after her. "Come back here Rachel!" The kite headed straight for an apartment building.

Vroom!!! She flew right into an open window and through a living room where a man sat eating pop-corn and watching a football game. "Yikes" yelled the man. He was so surprised that his pop-corn flew all over the room.

Vroom!!! Down the hall Rachel flew. There was a lady just coming out of the bathroom. "Yikes" yelled the lady. She was so scared that she jumped up in the air and her feet landed in the toilet.

Vroom!!! Rachel flew through the bedroom where there was a little baby sitting in a crib. The baby laughed when Rachel flew by. Right out the bedroom window Rachel flew. By this time there were nine police cars and three fire engines chasing Rachel. She was heading straight for the zoo!

Vroom!!! Through the lion's den she flew. They jumped up at her but she was flying too fast.

Vroom!!! Through the monkey's cage she flew. She knocked one monkey right out of a tree.

Vroom!!! She flew right between the legs of a big giraffe!

Vroom!!! She was headed for the elephants. One big elephant lifted his trunk and caught Rachel by the leg. He put Rachel on his back just as 31 police cars and 9 fire trucks pulled up.
"Get me down from here" yelled Rachel. One of the fire trucks put out its ladder and a firefighter climbed up to lift Rachel down.

Rachel gave Akela a big hug. "Akela! You always have the best ideas! What are we going to do *next* week?"

Handcraft:	Simple paper Kite

You will need:
- A rectangular piece of paper - A4 is good. Feel free to decorate it, either now or in step two.
- String - I used jute string in this example, but a reel of cotton works well too
- Something to make a hole in paper with - I used a hole punch, but feel free to improvise with a pen, a stick or whatever you have on hand

Optional extras:
- Sticky tape
- Decorations for paper - but don't weigh it down too much!
- A pen, pencil, stick or similarly shaped object
- A functional stapler and staples

Work Session:	**Knotting**

SW

Make and use the following knots correctly:

- Reef
- Slip reef
- Hank a short tope

Make and use the following knots:

- Round turn and two half hitches
- Figure of eight

GW

Make and use the following knots:

- Sheet bend
- Hank a long rope

- Bowline

Sing Song:	**If you're happy…**

If you're happy and you know it,
Clap your hands,
If you're happy and you know it,
Clap your hands,
If you're happy and you know it,
And you really want to show it,
If you're happy and you know it,
Clap our hands.

If you're happy and you know it,
Click you thumbs.
Stamp your feet.
Shout "WE ARE".
Do all four.

KITE FLYER'S CODE

- I will fly kites in an open field, away from electric power lines and transmission towers.
- I will use dry string, never wire. (Wire could attract and conduct lightning. I won't use anything metal in my kites.
- I will not try to remove a kite if it catches in an electric power line or on a high pole.
- I will not fly kites on or near public roads or highways.
- I will never fly a kite in wet or stormy weather. That only invites lightning.
