Cubs, the ocean creatures need our help! A secret message has been sent... but it's in code!
Before we find out more, let's prepare for inspection!

Inspection: (one marble for each)
○ Salutes correctly
○ Cub Cap (name inside)
○ Paws & Claws
Bonus marbles:
○ If you returned your good turns diary (1 marble)
○ If you returned a knitted/crocheted square (1 marble for each square)</td><td>Council Rock
Flag
Totem</td><td>Akela

Inspection:
Red Six = Akela
Yellow Six = Rocky
Green Six = Kaa
Black Six = Chikai</td></tr>
<tr><td colspan="5">Cubs, the sea creatures of the Big Blue need our help! Across the ocean, turtles, dolphins, sharks, and coral reefs are facing danger from pollution and unsafe waters. During this rescue mission, you'll need to listen carefully and react quickly to protect the creatures of the ocean!</td></tr>
<tr><td>17:55</td><td>10 min</td><td>Steam release: Guardians of the Big Blue

Same concept as Captain's Coming, but ocean-themed:

1. Cubs run around freely.
2. The Leader calls commands.
3. Cubs must do the action quickly.
4. If they do the wrong action, they need to become "seaweed" for 10 seconds by standing still and swaying around - think of the balloon man ➡️

Instructions (These don't all have to be selected):
• BIG WAVE: Cubs jump over an imaginary wave
• CRAB CRAWL: Cubs walk like crabs
• SAVE THE TURTLE: 3 cubs make a circle around 1 cub (the turtle)
• SCHOOL OF FISH: cubs group together and pretend to swim as a unit
• SHARK ATTACK: Cubs freeze, like statues to avoid the shark seeing them
• STORM AT SEA: Cubs spin around dramatically</td><td>  </td><td>Kaa</td></tr>
</table>

Excellent work, Guardians of the Big Blue! Thanks to your quick thinking and teamwork, many ocean creatures were rescued from danger today. Let's pause for a quick water break before beginning our next secret code mission.				
18:05	5 min	**Water Break**	Water bottles	All
Now that our Ocean Codebreakers are refreshed, it's time to begin your secret agent training. Tonight, each base will teach you a different way to send, hide, and crack secret messages!				
18:10	20 min	**Silver Wolves:** Using the number code i.e. A = 1; B = 2; C= 3 etc. SWs write a short message of no more than 12 words using the number code and hand it to their buddy to solve. ***SW:*** *Write and decipher a simple code.* *Sample sentences to choose from:* 1. *Keep our beaches clean so dolphins, turtles, and fish can live safely* 2. *Ocean animals need clean water because pollution makes their homes dangerous and unhealthy.* 3. *Cubs can protect sea creatures by picking up litter during beach cleanups regularly.* *For noting - if this exercise is too hard, the SWs can write a shorter message by choosing to write only the first 5 or 6 words of the above sentences, if 12 words are too much, however, to achieve the task for the Secret Codes badge, it will need to be 12 words.* *Also, they are welcome to choose their own sentences if they prefer.*	Number code print-outs (SWs) Complex code print-outs (GWs) Blank paper Pencils Tables Chairs	Akela Rocky
18.10	20 min	**Gold Wolves: (Option A)** Using the complex code i.e. A = ⭐; B = ❤️; C = 👣 etc. GWs write a short message of no more than 12 words using the number code and hand it to their buddy to solve. *Sample sentences to choose from:* 1. ***Plastic pollution harms coral reefs, sea turtles, fish, seabirds, and many dolphins worldwide.***		Chikai Kaa

		2. *Healthy oceans provide food, clean air, beautiful beaches, and safe homes for wildlife.* 3. *Every Cub can help ocean creatures by reducing waste and protecting marine environments.* *For noting - if this exercise is too hard, the GWs can write a shorter message by choosing to write only the first 5 or 6 words of the above sentences, if 12 words are too much, however, to achieve the task for the Secret Codes badge, it will need to be 12 words.* ***GW:** Write and decipher a complex code.*		
18.10	20 min	**Gold Wolves: (Option B)** **Protect ocean animals by keeping beaches clean and pollution-free.** GWs receive a knotting board and a diagram. The diagram shows several knots matching specific words. Working as a team, the GWs solve the code by figuring out the sentence. Knots in Order: 1. Round Turn & Two Half Hitches - Protect 2. Sheet Bend – ocean 3. Figure of Eight – animals 4. Fisherman's Knot – by 5. Reef Knot – keeping 6. Sheep Shank – beaches 7. Slip Reef – clean 8. Bowline - and 9. Clove hitch - pollution-free	Knotting display & answers	
Excellent work, agents! You've practised cracking codes, sending secret messages, and thinking like real spies. But every great Codebreaker needs one final skill - learning how to hide messages in plain sight and teaching our newest recruits the secrets of the Big Blue!				
18:30	20 min	**Invisible Ink**	Lemon juice	Kaa

		Cubs gather around a table and are given a short explanation about what invisible ink is and how it works and are shown an example of one made previously and then one that is heated to show how it works. Cubs then move into three groups and are given lemon juice, cotton buds and white paper and proceed to write their own secret messages. As it may take time to dry depending on how wet the Cubs make their paper, they are encouraged to take it home and to send photos in the Cub group, showing their message in order to successfully complete the badge requirements.	Cotton buds / toothpicks White paper Small bowls or cups	Chikai Rocky
18:30	10min	**Membership** Anna and Amanya join Akela to learn all about the salute & the left handshake They may join the rest of the Cubs after to do their invisible ink message	none	Akela
Agents, your secret training is almost complete! You've rescued messages, cracked codes, and mastered invisible ink - and the ocean creatures are safer because of you. But before we end our mission, they're asking one final favour: prove your teamwork, memory, and communication skills one last time!				
18:50	10 min	**Game: Dancing Dolphin Relay Chaos** Just like Broken Telephone, where secret messages become mixed up along the way, this game uses dance moves instead of words. Let's see whether the Cub at the end of the line can copy the steps correctly! * Cubs line up in Sixes. * Each Six stands in a straight line facing forward. * Everyone should be looking ahead — no peeking behind. The first Cub in each line is shown a silly dance sequence by their Old Wolf. The first Cub taps the next Cub on the shoulder and performs the dance sequence exactly as they were shown — ONCE only. Examples: * clap clap * wiggle hips * spin	none	Red Six = Akela Yellow Six = Rocky Green Six = Kaa Black Six = Chikai

		* floss * chicken arms * dab * jump After showing the moves, that Cub turns around, taps the next Cub on the shoulder, and shows them the dance sequence. This continues down the line until the last Cub receives the moves. The last Cub then runs to the front and performs the dance for the Old Wolf. Did they get it right?		
Cubs - mission complete the Big Blue is safer because of your teamwork and codebreaking tonight. Let's end our adventure by standing together one last time as true Ocean Codebreakers.				
19:00	15 min	**Closing** Badges Grand Howl / Flag down Prayer		Akela
Good Hunting, Cubs				
19.15		Dismiss		Akela

Advancements	
Membership	• Anna & Amanya: the left handshake & the salute
Silver wolves	• Write and decipher a simple code.
Gold wolves	• Write and decipher a complex code.

Badges in Program	
Secret Codes	We will work on the following 3 tasks, however the invisible ink task will need to be completed at home: • Think up and use a secret code. • Write a message in invisible ink. • Decipher a message of at least twelve words which has been written in a simple code.

National Challenge	
n/a	

Badges/Certificates to Award at Grand Howl	
First Aid and Health	Michael; Adam
