28th August 2026 Spring is in the Air 4th Benoni Cubs Duty Six: Grey

Time	Activity	Equipment	Resp.
5-30 10mins	Grandhowl Flag Inspection – General Neatness Attendance	Skin Flag Bones Register	Cobweb
After a long winter we are looking forward to Spring. Baby Chicks are a sign of new life and spring			
5-40 10mins	**Steam release- Chuck the Chicken** *Divide the pack into two teams. One team shouts "chuck the chicken" and throws the bean bag as far as they can. While the other team runs to retrieve it, the Cub that chucked the beanbag runs to a marker and back as many times as he/she can, counting out the number of laps loudly. The opposing team member who gets the bean bag chucks it back to the next Cub who repeats. The Cub with the most laps run wins.*	Beanbag	CI
Beans are one of the quickest, most rewarding vegetables to grow so see how quickly you can plant them in their rows.			
5-50 10mins	**Relay game – Bean Planting** Place an egg box in front of each Cub. Cubs are to run up carrying a bean and "plant" it in the egg box. Repeat until the 6 bean spaces are full. The first Cub finished wins.	Egg boxes (6 rows) 6 Beans Per Cub	CI
Springtime is the time for new growth so lets get planting seeds			
6-00 20mins	**Activity – Making a terrarium** See instructions below – 2lt coke bottles, soil, seeds, scissors, stones	See instructions below	All to help
When we are outside enjoying our wonderful world of nature, we must always remember our Outdoor Code.			
6-20 5mins	**Revision Game – Outdoor Code** Cubs are to find the pieces of their puzzle and put it together. Revise the outdoor code.	Outdoor puzzle per Cub	
New beginnings; time to learn new things.			
6-25 15mins	**Instruction:** **SW** - living Things - Make something out of natural materials – Pinecone Hedgehog **GW** – Make banana peel fertilizer	Cone Banana peels water bottle	Rikki Cobweb
Let's have some Spring Fun!			
6-40 10mins	**Team Game – Basket Ball** Divide the Pack into 2 teams. Each team has a chair and 1 Cub stands on the chair as the goalie. The teams throw the ball to one another and try to score a goal by throwing the ball to their goalie. If the ball is caught, the goalie changes places with the Cub who threw the ball.	2 chairs, ball	CI
Look after your seeds and enjoy watching them grow			
6-50 10mins	Grandhowl Flag Prayer Notices Bones	Skin Flag Prayer book Letters Bones book	Cobweb

A Coke bottle terrarium

- Empty 2 Litre Bottle
- Scissors or Knife
- Soil
- Small Rocks/Pebbles
- Water
- Seeds
- This terrarium science project is easy to make, but it will require some adult help.

- **Step 1:** Take your empty 2-liter soda bottle and make sure it is clean. Cut the bottom part off about 5 inches from the bottom of the bottle. (This is a good step for the adult helper.) Put the top piece of the bottle aside.
- **Step 2:** Fill the bottom half of the bottle with a layer of sand and then pebbles or small rocks. This helps with drainage for your terrarium. It's okay if you don't have sand available. The rocks really help though.
- **Step 3:** Next, if you'd like, add a small layer of activated charcoal. This is mainly to prevent any bad smells. So it's helpful if you are keeping your terrarium inside or planning on having several. We left our terrariums outside, so we skipped this step.
- **Step 4:** Add a layer of potting soil. This should go up almost to the top of your bottle half.
- **Step 5:** Add your seeds or small plant to the soil. Water and add fertilizer as you feel necessary.
- **Step 6:** Take the top half of the bottle and place it back over the bottom half. (Keep the cap on.) This creates a terrarium environment where moisture is trapped to help the plant grow. You will need to add water periodically though, as it is not completely sealed.
- **Step 7:** Place your terrarium in your yard or in a window to get light and watch your plants grow!

OUTDOOR CODE

I will do my best	to protect and care
for wildlife, trees	and flowers
I will do my best	to keep the countryside
roads and beaches	free of litter

SILVER WOLF

Hedgehog Pinecone

1. A selection of pinecones
2. Felt – we used black, brown and pale beige
3. Scissors
4. Low melt glue gun
5. Googly eyes

We cut the face in the shape of a triangle with the corners rounded using brown felt. We then cut circular noses out of the black felt. Using a low melt glue gun we stuck the noses onto the face and also used it to stick googly eyes onto the felt faces before glueing the faces to the pinecone hedgehogs.

GOLD WOLF – (Katie)

Banana Peel Fertilizer

Supplies needed:
– glass mason jar with lid
– water
– banana peels

Directions:
1. Add the banana peels to the glass jar. There is no need to cut the peels. I like to make sure the jar is about half way full so that there is plenty of room to add water.

2. Fill the jar with water. I use room temperature tap water. Fill to the top. Replace the lid tightly.

3. Place the jar on a patio or porch to steep. Allow the mixture to sit for 5-7 days to really pull the nutrients out of the peels.

How to Use Banana Peel Water Fertilizer

First option: Remove the banana peels from the jar and simply pour the nutrient rich water on the base of your plant.

Second option: Pour the entire jar around the base of your plant. Gently toss the peels (which will now be pretty softened and mushy) into the soil where they will continue to break down and feed the soil.

You can repeat this process every few weeks to continue to give your plants the boost they need to get through the season.
