16102026 4th Benoni Cubs Finding Nemo – National Challenge Flood Tray Diorama
Duty Six: Grey

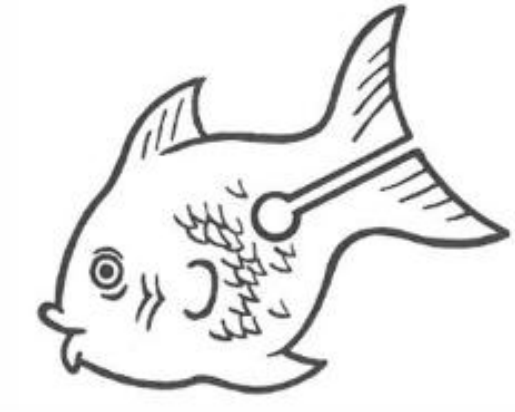

Time	Activity	Equipment	Resp.
5-30 10mins	Grandhowl Flag Inspection - Woggles Attendance	Skin Flag Bones Register	
Marlin and his wife Coral live in the Great Barrier Reef, expecting hundreds of eggs. A barracuda attacks, leaving Marlin with only one surviving egg, which he names Nemo			
5-40 5mins	**Steam release- Buddies** Cubs run round freely; on the blow of a whistle Cubs must group together as follows: Buddy System 2 Dory 1 Darla 3 Seagulls All	None	Akela CI
Years later, Nemo—born with a small fin—starts school and longs for independence. After arguing with Marlin, he swims into open water and is captured by divers.			
5-45 10mins	**Relay game – Swim in the Sea** Prior to the game, set up the following: a line for each Team (2) onto which a plastic cup has been placed (line through the cup). Each Six is given a pistol (empty dishwasher bottle) of water. On 'go' each Cub in the Six takes it in turn to squirt water into the cup. This will send the cup 'swimming' along the line. The Six who finishes first is the winning team.	String plastic cups water pistol bucket water	Akela Cobweb CI
Marlin sets out to find him and meets Dory, a friendly blue tang with short-term memory loss. Together they face sharks, jellyfish, and other dangers while crossing the ocean.			
5-55 10mins	**Team Game - Water carrying** Divide the Pack into two teams. Place a bucket of water in front of each team and an empty bucket at the back. Cubs to sit in a line about an arms-length apart. The front Cub is given a mug. At 'go' he/she dips the mug into the water and passes it to the net Cub and so on down to the end of the line. When the last Cub receives it he/she pours the water into the empty bucket and the empty mug is then passed back up the line. The first cub again fills the mug and passes it down and so on until the mug has been filled five times in all. The cubs should try not to spill. At the end of the game the Leader should measure the water level in each bucket and award bones accordingly.	3 buckets 2 cups water	Akela Cobweb CI
Meanwhile, Nemo gains confidence and works with the tank gang to attempt escape			
6-05 20mins	**National Challenge Diorama – Flood in a tray** Cubs are to make a Diorama. When finished they pour water over it to see the effects of flooding on the land   See Instructions below	Beer trays Animals Soil Trees Plants Bucket Water	All to help Tray per team (2)

Marlin and Dory eventually reach Sydney, and after a series of events, Nemo escapes the tank and reunites with Marlin.			
6-25 10mins	**Activity – Fun Fish** Cut out the fun fish, including the channel and hole in the tail. Place it in a bowl of CLEAN water and put a drop of oil into the hole in his tail. Oil has tremendous ability to spread out very thinly. As the oil floats and spreads over the water it will move the fun fish forwards. ***Talk about the importance of clean drinking water (Katie)***	Fish cutout Tray clean water Oil in dropper bottle	Rikki
Marlin learns to trust Nemo's abilities, and both grow from their journey			
6-35 15mins	**Sense Game (Sound) – Rub A Dub – Dub** You will need 20 (or more) film canisters or similar; these should be opaque and all look the same. Into half of these you place a marble, bell, or anything that will make a noise when the container is shaken. The Cubs sit in a circle and take it in turn to pick up two containers at a time and give them a shake. If they both rattle then a point is given to the Cub who picked them up. These containers are then removed from the game and the next Cub has a turn. If both containers don't rattle then they are both replaced where they were picked up from and the game continues. The game gets more difficult as more and more containers are removed as there are more empty ones left in the game than ones that rattle. This game can also be played as a team with the winning team being the one with the most points.	20 film cannisters Half filled with marbles	
The core moral of Finding Nemo is that love requires trust—Marlin must learn to let go of fear so Nemo can grow, and Nemo learns courage by facing challenges.			
6-50 10mins	Grandhowl Flag Prayer Notices Bones	Skin Flag Prayer book Letters Bones book	

Swim in the Sea

Fun Fish

National Challenge = Flood tray Diorama

Task 1 – Awareness

Make a 'Flood in a Tray' diorama by building a mini landscape with soil, toy animals, trees, and a dam. Pour in water to see how floods wash away vegetation, drown animals, damage farmland, and break dams. Rebuild with 'solutions' (higher houses, stronger dams) and test again.
