Name: First Aid

Date: 2025/06/13

Time	Min	Activity	Equipment	Scouter	Advancement/ Badge
17:30	10	**Opening Ceremony** **Attendance**	Flag, Totem, skin, Register		
Cubs are always busy and can sometimes get hurst which is why it is important to have a proper first aid kit on stand by.					
17:40	10	**Steam release:** **Pack the first Aid kit** A Relay race where different items on a first aid kit is lined up on chairs, cubs must run and collect the items in the first aid kit and bring it back to their chair. Cubs can only pick up on item at a time.	• First aid equipment pictures (Hathi) • Chairs	Hathi (to run and set up) Rama to help Hathi with running Bageria & Juliet to take down	**First Aid Interest Badge** • Be able to identify the items in a first aid kit and give an example of what you can use them for.
Our hall has a first aid kit. Do you know where it is?					
17:50	5	**First Aid Kit locate.** Cubs must find where the hall fist aid kit is. Once they find it, they must stay in that are.		Hathi	**First Aid Interest Badge** • Show where the first aid kit can be found in the Scout hall/Pack meeting place.
I don't think our first aid kit is very good…can you see what we are missing.					

17:55	20	**First Aid Kit check.** Cubs check the first aid kit and what is inside it. They must make a list of what they should be in it as well as what is missing. Cubs must them take this list home and make a simple first aid kit to bring to cubs the next week to get the advancements sign off.		Hathi & Rama	**First Aid Interest Badge** • Be able to identify the items in a first aid kit and give an example of what you can use them for.
Someone what we need to hep people is not always in the first aid kit, sometimes it the knowledge in our mind.					
18:15	30 10 min per base	**Bases:** **Base 1: Fire** Teach cubs what to do when their clothes are on fire and what to do when other's clothes are on fire. Cubs to demo and practise on each other **Base 2: Recovery position** Teach cubs how to put someone in the recovery position. Cubs to demo and practise on each other. **Base 3: CPR** Teach cubs how to do CPR. Cubs to attempt to practise how to do the task.		Base 1: Bageria or Juliet Base 2: Rama Base 3: Hathi	**First Aid Interest Badge** • Demonstrate what to do if your clothes or another person's clothes catch fire. • Demonstrate how to put someone who is unconscious/not responding, but is breathing, in the recovery position. • Explain what CPR is and when it is used.
Time to go home.					
18:50		**Closing grand howl**	Flag, Totem, skin, badges		

Base 1

If **YOUR** clothes

1. stay calm
2. Stop, drop, and roll
   Stop
   - Stop running immediately.
   - Running makes the fire burn bigger because of the air.

   Drop
   - Drop to the ground quickly.
   - Cover your face with your hands if you can.

   Roll
   - Roll over and over to smother the flames.
   - Keep rolling until the fire is out.
3. Call for help

- Shout for an adult or emergency help.

If **SOMEONE ELSE'S** clothes are on fire

1. Get an adult immediately.
2. AFTER the person has rolled out most of the flames and if it is SAFE FOR YOU:
   - A fire blanket
   - A heavy coat
   - A towel
     to help smother the flames.

DO NOT:

- Throw any water or anything on the person (you don't know how it started so you will make things worse)
- Chase after the person (that may cause them to panici, just shout stop drop and roll)
- DO NOT PUT ANYTHING ON THE BURNS EXCEPTE COOL RUNNING WATER TILL HELP ARRIVES

Base 2

Why:

The recovery position:

- Keeps the airway open
- Helps them breathe safely
- Stops choking if they are sick or vomit

When TO put someone in recovery position:

- unconscious or not responding BUT STILL breathing normally

Always check if the person is responding (call out to them and give them a slight shake)

Wen NOT TO put someone in recovery position:

- unconscious or not responding AND NOT breathing normally (CPR)
- You think they may have a serious neck or back injury

Base 3

CPR

- Cardiopulmonary Resuscitation
- Used when the person is unconscious or not responding AND NOT breathing normally
- Oxygen filled blood moving around the body until help arrives

- Help arrives/a more advanced first aider takes over
  The person starts breathing
  You are unable to continue due external dangers/physically too exhausted (about to collapse)

30 compressions to 2 breaths (DO NOT DO BREATHS UNLESS YOU HAVE A MOUTHPIECE)
Breaths only extremally important in drowning
Only do compressions
Rorate after your 30
4 – 5 cm deep compressions (not uncommon to break/crack ribs)
