6:10	**Hand Drill:** Use and Care **Vice:** Use and Care	Hand drill, vice, drill bit	
6:20	**Screwdriver:** Use and Care	Screwdriver, screws, bottle caps	
6:30	Figure-of-Eight Knot	Bits of rope or string	
6:35	Reef Knot		Show alternate method
6:40	Game: Train Relay Race	Cones	First Cub in each Six racers around the course. They then pass their Six's train to the next Cub, as a relay
6:50	Badges + Recruiter Badge		Discuss interest and recruiter badges
6:55	Grand Howl		

This simple Cub Cart consists of two dowel axels cut to fit a sturdy box. The wheels (large plastic lids, such as from an Oros bottle) are attached with wood screws to the axels. Drill pilot holes in the dowels to make it easier for the Cubs to screw the wheels to the axels. Punch or drill holes into the back and front of the cart, then thread a bit of string or rope through each hole. Fix in place with a figure-of-eight knot on the inside of the cart. The cart can then be attached to other carts with a reef or slip reef knot.
