The Teeny, Tiny, Inside Outside Safari Adventure 19 June 2026

Time	Activity	Gear	Notes
17:30	Grand Howl	Totem, skin, flag, prayer book	Red Six is on duty
17:35	Inspection	Beans	Correct camp uniform, attendance, big smile.
We're going on a TEENY, TINY, Inside Outside adventure, right here in our Scout Hall. Can you imagine it? We have our sun hats on, and lots of sunscreen, because the sun is blazing hot. All around us we can hear the sounds of the veld. There are insects chirping, birds singing… Oh! What's that!? I think I heard a *lion* roar! Let's pretend we're buck, and we have to run away from the hungry lion!			
17:40	Buck, buck, Lion!		*Duck, Duck, Goose*, but use veld-version.
Phew! After all that running, we're deep, deep in the veld. Are we lost?			
17:50	Lost in the Veld-Izzy Dizzy Game	Beans Lost in the Veld questions. Incorrect examples are in italics first.	**GW: Lost in the Veld** **SW: Explain the Buddy System** Cubs sit in relay form. When an incorrect sentence is read, the first Cub runs to the end of the hall, puts one finger on the ground and circles around the floor 5 times (without lifting the finger). They then stagger back. First one correct and back gets a bean.
We are lost! But don't worry, we're resourceful, clever Cubs. We'll come up with a plan. First, we need to be on the look out for danger. We don't need to be scared of danger, we just have to know what *is* dangerous so we can stay safe in the bush veld. And look there! I can see the campsite. If we're careful, and can avoid all the dangers, we can make our way back safely.			
18:05	Natural Dangers in the Veld – Mine Field Game	36 Cones Mine field map	**SW: Know the 8 Compass Points** **GW: Natural Dangers in the Veld**
We made it to camp. Phew! I'm so hungry, I could eat a lion! Let's make a fire to cook some food.			
18:20	Fire Safety Review	Posters	Fire Safety Rules
Okay, let's check that we can all strike a match and light a candle safely.			
18:25	Striking a Match	Matches Candles Tins with Sand	**SW: Fire safety and striking a match**
You did a great job! Before we build a fire, we need to know *how* to build a fire.			
18:35	Fire building discussion	Tinder, kindling sticks logs, bricks, table	Build a "fire" on a table. Bricks -> metal sheet -> tinder -> kindling -> fuel
Now you're ready to make your own fire.			
18:40	Sweet Fires	Sweets (pre-cut and shared) Paper plates or napkins	Cubs make a fire using popcorn as rocks, candy floss tinder, other sweets for sticks, Budoir biscuits for logs, and cheese curls for flames.
You did a great job! You learned what to do if you get lost in the veld and what dangers to watch out for. You also learned how to safely light a match and make a fire. Good job, Cubs!			
18:55	Grand Howl	Flag, skin, totem	Investiture next week: full uniform

SW: Know the 8 Compass Points
SW: Fire safety and striking a match
SW: Explain the Buddy System

GW: Natural Dangers in the Veld
GW: Lost in the Veld

Fire	X	X	X	X	**Start**
Sunburn & Heat Exhaustion	X	Got Stuck	Sting/Bite (Snake, Spider, Scorp.)	Danger of Falling	Got Lost
X	X	X	X	X	Dangerous Wild Animals
Dirty Drinking Water	Falling Tree/ Branches in High Wind	Stream/River Flooding or X-ing Danger	Rain, Wind, and Cold: Exposure	X	Dangerous Plant
X	X	X	X	X	Falling Rocks/ Avalanche
End	Eating Poisonous Plant	Run out of Water	Mosquitos/ Animals with Rabies	X	Lightning

Be prepared, and do your best not to get lost in the first place!

These are things you can do before you head out:

Don't tell anyone where you're going.

Before you leave, tell someone where you are going.
Always tell someone where you are going and when you will be back. Make sure that when you do get back you let them know so that they don't call out the cavalry.

Never take water with you on a hike. You might drown.

Be prepared
Even if you are only going for a day walk, always take a map and a small emergency kit: first aid, torch (to signal rescuers), matches (to light a signal fire), food and water, warm clothing, a small mirror for signalling rescuers.

You don't need to plan your trip. Just use Google.

Plan your expedition
You are much less likely to get lost if you plan your route, study the map before you start, and know how long it will take. Also check the weather forecast before you go.

You don't need to keep checking your map. Everything will probably work out if you keep walking.

Keep track of where you are
Along the way, keep checking the map and taking a mental note of landmarks that you pass. Keep an eye on the time, and on any changes in the weather.

Split up, so you can cover more ground.

Stick together
Use the buddy system. Don't get separated from the rest of the group. Work as a team.

If you get lost, don't panic - be resourceful!

Run! Maybe you'll find

Stop - don't push on into the unknown
As soon as you know that you are lost, stop. You are safer staying on a rocky ledge than trying to find a way down a dangerous cliff. If it is getting dark, it is far better to set up a camp in the remaining light rather than to stumble on in the dark.

Run around like a headless chicken!

Stay calm, and think!
Don't panic! You are much safer if you stay calm and think clearly.

Find a windy, cold place to stand.

Take shelter
Find shelter or build a shelter to protect you from the elements - wind, cold, rain, heat. Try to build a fire to keep you warm.

Leave your car, because if it's not working it can't help you.

Stay with your vehicle
If you break down in a vehicle, stay with it. It is much easier for a rescuer to find a car than a person who has wandered away! A vehicle can help in many ways, even if it can't drive.

Sit on your hands and do nothing.

Signal for help
Build a signal fire with lots of damp leaves to ensure that the fire produces a lot of smoke. Make ground-to-air signals in a clear spot. Shout and blow a whistle when a rescuer is near.

Put spread mud on your face and make sure nobody can spot you.

Be visible
As soon as the sun comes up, try to find an open place where you could be seen from the air. Stream beds are excellent for this if you are in thick vegetation. Search helicopters generally traverse waterways first of all when looking for missing people.

Eat all your food, because the extra energy will help you think better.

Make your supplies last
Ration your food and water. Try to make it last as long as you can. If you are low on water, find a source of water.

Be impatient.

Be patient
If someone knows that you are missing, help is on the way.
