Pokémon Beach Party

Gotta Save 'Em All

Time	Min	Activity	Equipment	Scouter
5:30	5	Grand Howl Flag Prayer	Flag/flagpole Prayer book Council rock	
Ash and his friends are going to the beach. Do you have your sunscreen and hat? Does your Pokémon have their sunscreen and hat? *We need a PLAN to keep our Pokémon safe, and, if there's an emergency, it will help us keep calm.*				
5:35	10	4 teams, each with a hula hoop base. Each team has a cone with a letter P, L, A, or N. Each team is trying to get the full PLAN set in their base. You can only carry one cone at a time. If tagged, you must drop your cone and go back to your base. The game is over when one team has all the cones. Explain that P = Prepare, L = Look, A = Adult, and N = Never (the Swimming Rules)	4 Hula hoops 4 cones, each labeled P, L, A, or N.	
Will you remember the PLAN when you go swimming next time?				
5:45	10	LEARN SAFE WAYS BY MAKING A PLAN: Run through the PLAN with the Cubs to reinforce the importance of having this in place and refer to the 'be water safe' facilitator manual. P — prepare: ask the Cubs what they think they would need for a day at the beach or swimming pool. L — look: ask the Cubs what they need to look out for at the beach or near water — look for dangers. A — ask an adult: ask the Cubs why it is important ask for permission to go swimming. What else do they need to tell a responsible adult? N — never: ask the Cubs to tell you what the safety rules are.	(See last page)	
When have a PLAN, the first thing you need to do is Prepare. What will you pack?				

Time	Min	Activity	Equipment	Scouter
5:55	10	CIRCLE GAME: A day at the beach or swimming pool The Cubs sit in a circle. The leader starts by saying: “in my bag I have a sun hat”. The next Cub then says: “in my bag I have a sun hat and some water. Continue around the circle, each Cub adding an item until no one can remember any more items.	None	
Always think about your own safety before help a friend or rescuing a Pokémon who is in trouble in the water.				
6:05	5	DEMONSTRATION: Have two Cubs step up to the front. Have one stand on a step or something higher, and the other standing opposite on the ground. Use this time to demonstrate one child needing assistance in the water (the one on the ground) and the other helping from the shore/bank (the one on the step). The Cub ‘in the water’ then pulls the other slowly off the step and they are now both ‘in the water’. Explain that the step is the bank of the river/lake/dam and when you try to help with your hand you have very little balance and are at risk of falling into the water. Highlight that the drowning Cub (victim) will use all their strength to stay above water and unintentionally push the other (the Cub that was pulled off the shore) underwater. Fear will set in for the second Cub, and they react in the same manner thus pushing the first Cub back under water. This see-saw action will continue until one Cub can no longer get back above water and it's at this point that one or both will drown.	Step/box	
Oh no, some Pokémon have been swept into the water by a large wave. How many can you rescue!				
6:10	10	RELAY GAME: Rescue Reminder: Never swim out to help someone, rather throw something that floats into the water for the person in difficulty to grab and use to float. Sixes line up in relay formation. In front of each Six, draw a circle about two metres away. Each Six has an empty bottle attached to a rope and, at the word ‘go’, they gently throw the bottle so that it lands right in the circle. If they are lucky, they run out, pick it up, run back to their line and hand the bottle to the next Cub in line after which they go to the back of the line. If the bottle does not land in the circle, the Cub who threw it must run and get it and have another turn.	An empty 2 litre plastic bottle tied to a rope per Six. Pokémon “cards”	
There are lots of water type Pokémon in the sea, but they’re getting sick because of all the plastic pollution. Can we find a way to help the Pokémon?				
6:20	10	Poison bottles game: Cubs make a circle and try to pull each other into the bottles to get them out.	Plastic 2l bottles.	

Time	Min	Activity	Equipment	Scouter
We can reuse old plastic bottles to make something useful. Then the plastic bottle won't end up in the sea where it'll be dangerous for fish and water Pokémon.				
6:30	25	Making eco bricks	Bottles Scissors Plastic rubbish	Claire
Don't forget to have a PLAN if you go on an outing near water.				
6:55	5	Closing Flag Prayer Dismiss	Flag/flagpole	

Swimming Rules:

• Never swim alone; use the 'buddy system'.
• Never swim in unknown waters (that is, in dams, rivers or pools you do not know).
• Never dive into water if it is not clear or if you do not know how deep it is. You could hit something and hurt yourself.
• Never swim with your clothes on – they get heavy.
• Never swim and drink alcohol. Also, never swim when supervised by adults that have been drinking/are drinking alcohol as their response time to help will be impaired.
• Never swim when you are too … anything … too tired; too hungry; too cold; too upset.
• Never run around the pool, river or dam, always walk.
• Never push people into a pool, river or dam, dive without first looking or duck your friends.
• Never eat or chew while swimming.
• Never use your hand to rescue a friend.
• Never jump in to save your friend – call for help!
• Never leave a child alone when they are near water (MOST important 'never' for Adult Leaders/supervising volunteers or parents).
• Never be distracted by your cell phone while working with children in or near water.
